PROFILE

AI/ML undergraduate, OpenAI Student Collective Campus Lead, and self-taught builder who ships independently — from multi-agent AI systems to full-stack products to games. Selected by 1M1B as a Top 30 student changemaker for AI-for-sustainability work, and by OpenAI as 1 of 100 Campus Leads in India from 60,000+ applicants. Looking to bring the same initiative and end-to-end ownership to a team solving real problems.

EDUCATION

Alliance University, Bangalore — Bachelor of Computer Applications (Hons.), AI/ML Specialization
2nd Year (3rd Semester) | Expected Graduation: 2029 | CGPA: 8.25/10 | Class Representative for a cohort of 69 students

LEADERSHIP & RECOGNITION

- **OpenAI Student Collective — Campus Lead, Alliance University** — selected as 1 of 100 Campus Leads in India from over 60,000 applicants; leads campus-wide AI community building and events.
- **1M1B Green Internship — Top 30 Student Changemaker** (AICTE + IBM SkillsBuild) — built Byte2Bite, an AI fridge-to-recipe app.
- **1M1B Workplace Experience — Tech Ace Badge** — built CarbonCast (carbon footprint predictor) on Team Nimbus; separately built EcoLens, placed Top 30.
- **Class Representative** for a cohort of 69 students at Alliance University.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript
- **AI/ML:** LangChain, LangGraph, HuggingFace, Ollama, OpenAI & Anthropic APIs, Vision AI, Agent Development Kit (ADK)
- **Backend & Data:** FastAPI, WebSocket, PostgreSQL, MongoDB, Redis, Vector Search (Oracle 26ai)
- **Frontend & Infra:** React, Three.js, Docker, AWS, Google Cloud Platform, Kubernetes

FEATURED PROJECTS

EcoLens — React 19, TypeScript, MongoDB, DeepSeek AI, Climatiq API. AI sustainability platform estimating carbon impact via ISO 14040/14044 with personalized recommendations. Showcased to Microsoft leadership at the 1M1B Centre of Excellence.

AgenticBank — LangGraph, FastAPI, WebSocket, Oracle 26ai. Multi-agent banking simulation: six specialized agents coordinating over real-time WebSocket, backed by vector search.

Byte2Bite — Qwen-VL/Moondream, IBM Granite. Scans a fridge photo, auto-detects ingredients, and suggests recipes from 138+ options before food spoils, with an SDG-12 waste score and a conversational cooking assistant.

TruthEngine — AI-powered fact verification platform gathering and organizing multi-source evidence to evaluate claim credibility.

OTHER PROJECTS

- **Nishanka** — all-in-one Discord bot, 250+ commands across moderation, economy, music, games, and server management.
- **Sidespin** — Three.js table tennis game; 1v1 vs. a bot or online multiplayer in a private room, no physical table needed.

CERTIFICATIONS

- Google Cloud Gen AI Academy APAC 2026 — Hack2skill (Jul 2026)
- Engineer AI Agents with Agent Development Kit (ADK) — Google (May 2026)
- Deploy Kubernetes Applications on Google Cloud — Google (May 2026)
- Google AI Specialization — Google / Coursera (Mar 2026)
- Algorithms on Graphs — UC San Diego / Coursera (Feb 2026)
- Object-Oriented Programming in Java — IBM & UC San Diego / Coursera (Feb 2026)
